Project and the Property. The Conditions associated with the Map are included in Exhibit "B" attached hereto.

1.3. Intent of Plans. The intent of the Plans referenced in Section 1.1 is to prescribe a complete work of improvement which Developer shall perform or cause to be performed in a manner acceptable to the City Engineer, (or designee), and in full compliance with all codes and the terms of this Agreement. Developer shall complete a functional or operable improvement or facility, even though the Plans may not specifically call out all items of work required for Developer's contractor to complete its tasks, incidental appurtenances, materials, and the like. If any omissions are made or information necessary to carry out the full intent and meaning of the Plans, Developer or its contractor shall immediately notify its design engineer who will seek approval of the City Engineer for furnishing of detailed instructions. In the event of any doubt or question arising regarding the true meaning of any of the Plans, reference shall be made to the City Engineer whose decision thereon shall be final.

Developer recognizes that the Plans consist of general drawings. All authorized alterations affecting the requirements and information given on the Plans shall be in writing and approved by the City Engineer. The Plans shall be supplemented by such working or shop drawings as are necessary to adequately control the work. Without the City Engineer's prior written approval, no change shall be made by Developer or its contractor to any plan, specification, or working or shop drawing after it has been stamped as approved.

1.4. Survey Monuments. Before final approval of street improvements, Developer shall place survey monuments in accordance with the provisions of the State Subdivision Map Act, the Subdivision Ordinance of the City of Chino, and any other applicable law. Developer shall provide security for such obligation as provided in Section 4.1(a)(iii) and, after setting the monuments, Developer shall furnish the City Engineer written notice of the setting of said monuments and written proof of having paid the engineer or surveyor for the setting of said monuments.

1.5. Performance of Work. Developer shall furnish or cause to be furnished all materials, labor, tools, equipment, utilities, transportation, and incidentals required to perform Developer's obligations under this Agreement.

1.6. Changes in the Work. The City Engineer, without invalidating this Agreement and without notification to any of the sureties or financial institutions referenced in Paragraph 4, may order extra work or may make changes by altering or deleting any portion of the Works of Improvement as specified herein or as deemed necessary or desirable by the City Engineer as determined necessary to accomplish the purposes of this Agreement and to protect the public health, safety, or welfare. The City Engineer shall notify Developer or its contractor in writing (by Correction Notice) at the time a determination has been made to require changes in the work. No field changes performed or proposed by Developer or its contractor shall be binding on City unless approved in writing by the City Engineer. The City and Developer may mutually agree upon changes to the Works of Improvement, subject to the security requirements in Section 4.

1.13. Suspension of Work. The City Engineer shall have authority to order suspension of the work for failure of the Developer's contractor to comply with law pursuant to Section 1.12. In case of suspension of work for any cause whatsoever, Developer and its contractor shall be responsible for all materials and shall store them properly if necessary and shall provide suitable interim drainage and/or dust control measures, and erect temporary structures where necessary.

1.14. Erosion and Dust Control and Environmental Mitigation. All grading, landscaping, and construction activities shall be performed in a manner to control erosion and prevent flooding problems. The City Engineer shall have the authority to require erosion plans to prescribe reasonable controls on the method, manner, and time of grading, landscaping, and construction activities to prevent nuisances to surrounding properties. Plans shall include without limitation temporary drainage and erosion control requirements, dust control procedures, restrictions on truck and other construction traffic routes, noise abatement procedures, storage of materials and equipment, removal of garbage, trash, and refuse, securing the job site to prevent injury, and similar matters.

1.15. Final Acceptance of Works of Improvement. After Developer's contractor has completed all of the Works of Improvement, Developer shall then request a final inspection of the work. If items are found by the City's inspectors to be incomplete or not in compliance with this Agreement or any of the requirements contained or referenced herein, City will inform the Developer or its contractor of such items. After the Developer's contractor has completed these items, the procedure shall then be the same as specified above for the Developer's contractor's initial request for final inspection. If items are found by City's inspectors to be incomplete or not in compliance after two (2) "final" inspections, the City may require the Developer or its contractor, as a condition to performing further field inspections, to submit in writing a detailed statement of the work performed subsequent to the date of the previous inspection which was found to be incomplete or not in compliance at that time. Developer shall be responsible for payment to City Engineer of re-inspection fees in the amount necessary to cover the City's costs for additional final inspections, as determined by the City Engineer.

No inspection or acceptance pertaining to specific parts of the Works of Improvement shall be construed as final acceptance of any part until the overall final acceptance by the City Engineer is made. The City Engineer shall make a certification of completion and acceptance on the Works of Improvement by recordation of a Notice of Acceptance on behalf of the City. Final acceptance shall not constitute a waiver by the City Engineer of defective work subsequently discovered.

The date on which the Works of Improvement will be considered as complete shall be the date of the Notice of Acceptance.

1.16. Vesting of Ownership. Upon recordation of the Notice of Acceptance, ownership of the Works of Improvement shall vest in the City.

1.17. Developer's Obligation to Warn Public During Construction. Until recordation of the Notice of Acceptance, Developer shall give good and adequate warning to the public of any dangerous condition of the Works of Improvements and shall take reasonable actions to

The City Engineer shall evaluate all claims to Force Majeure and make a reasonable determination regarding the length of any extension of time for commencement and/or completion of the Works of Improvement and the City Engineer's decision shall be final.

2.4. Continuous Work. After commencement of construction of the Works of Improvement (or separate portion thereof), Developer shall cause such work to be diligently pursued to completion and shall not abandon the work for a consecutive period or more than thirty (30) days, events of Force Majeure excepted.
